How to run a Delivery Health Check

This guide is for the consultant in the room. A session usually takes about 30 minutes with the delivery lead. Open the app, score the 20 statements together, then print or save the one-page summary.

App: https://health-check-believ1.vercel.app

Use a current desktop browser (Chrome is the one checked for printing). There is no login. The assessment stays in this browser on this computer only.

Before you start

1. Open the app on the computer you will use for the whole session.
2. If a previous assessment is still on the screen, choose **Start new assessment**, then **OK**. That clears the name, the client, and every answer.
3. Agree with the delivery lead that 1 means the statement is not true, and 5 means it is.

Fill in the engagement

Field	What to enter
Engagement name	Required. Results stay hidden until this has at least one real character. A name made only of spaces does not count.
Client	Optional. Leave it blank if you do not have a client name yet.
Assessment date	Defaults to today. Change it if the session is for another day. Clearing the date puts today back.

The three fields at the top of the page. This example uses the engagement name Northwind billing rebuild.

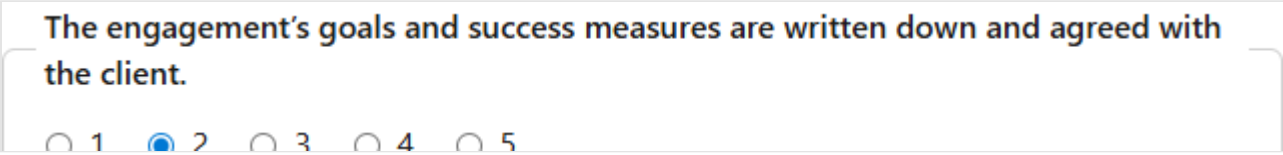

Answer the statements

There are 20 statements, four in each area, in this order: Scope, Schedule, Team, Quality, Stakeholders.

The scale is shown once at the top:

Score	Meaning
1	Strongly disagree
2	Disagree
3	Partly
4	Agree
5	Strongly agree

Each statement has buttons labelled 1 to 5. Pick one. You cannot clear a score. To change it, pick a different number. Other statements stay as they are.

One statement, with 2 selected. The other four choices stay available if you want to change it.

Until the name is filled in and all 20 statements have a score, the page says: **Enter the engagement name and answer all 20 statements to see results.**

Read the results

Results appear on the same page as soon as the assessment is complete. They update straight away if you change a score, the name, the client, or the date.

Each area score is the average of its four answers, rounded to one decimal place. Halves round up (4.25 becomes 4.3). The overall score is the average of the five area scores, rounded the same way.

Band	Rounded score
Green	4.0 and above
Amber	3.5 to 3.9
Red	Below 3.5

The overall result uses the same bands, with one exception: if the overall score would be Green and any area is Red, the overall result is Amber. An Amber area does not pull a Green overall result down.

Print / Save as PDF

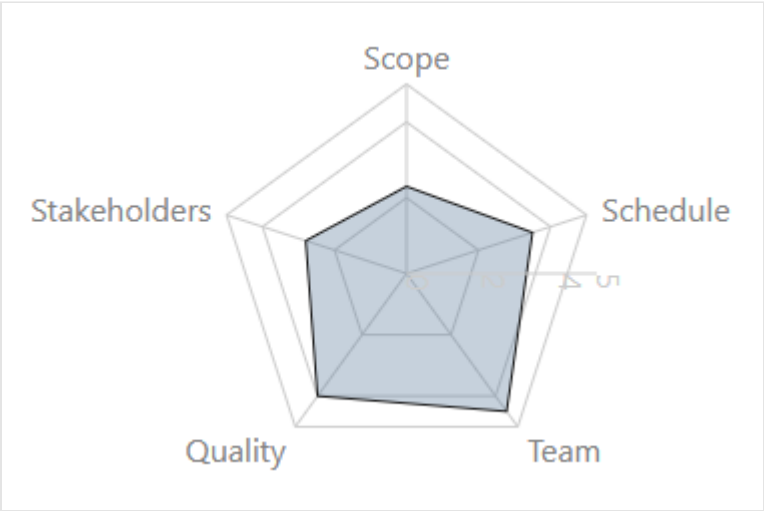

Overall 3.4 Red

Area	Score	RAG
Scope	2.3	Red
Schedule	3.5	Amber
Team	4.5	Green
Quality	4.0	Green
Stakeholders	2.8	Red

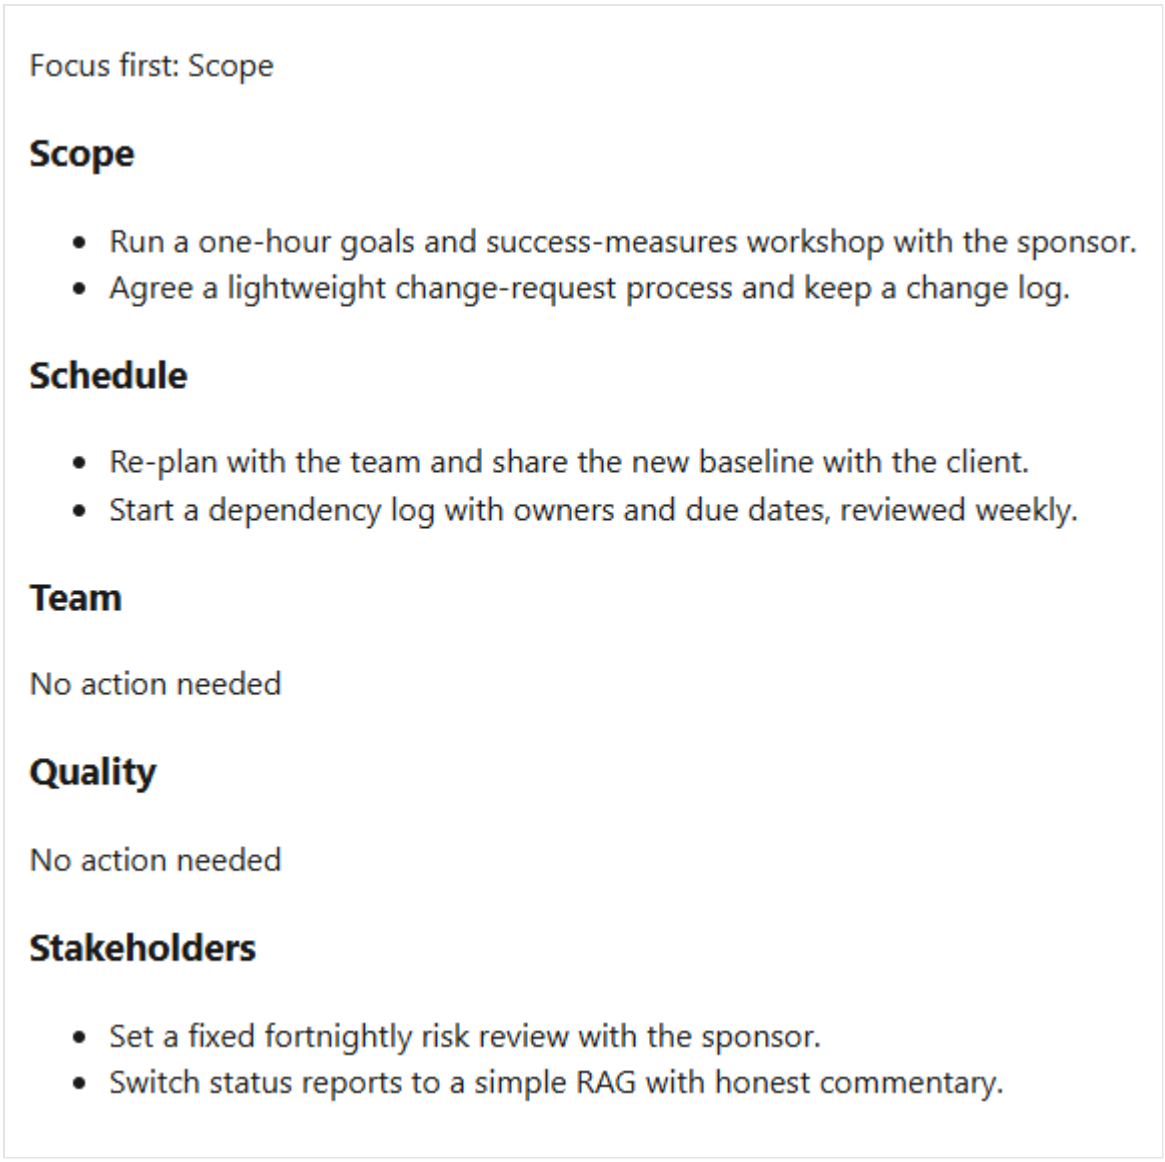

Example results. Scope 2.3 and Stakeholders 2.8 are Red. Schedule 3.5 is Amber. Team 4.5 and Quality 4.0 are Green. The overall score is 3.4, so it is Red. The Print / Save as PDF button sits just above the results.

Focus first names the lowest-scoring area. If two areas tie, the earlier one in the list wins: Scope, then Schedule, then Team, then Quality, then Stakeholders.

Every Red or Amber area shows two suggested actions. A Green area shows **No action needed**.

The radar chart plots the same five scores on a 0 to 5 scale. Scope and Stakeholders sit closer to the centre. Team reaches out towards 5.

Focus first is Scope, the lowest score. Red and Amber areas list two actions. Green areas say No action needed.

Keep the answers

Each change is saved in this browser immediately. Reload the page and the same assessment comes back, including a partly finished one.

Only one assessment is kept. Another tab does not update until you reload it. A different browser or computer does not have these answers.

Print or save a PDF

When results are showing, choose **Print / Save as PDF**. The browser print dialog opens. To save a file, pick **Save as PDF** (or **Microsoft Print to PDF**) as the printer.

The printed page is the summary only: the title, engagement name, client, date, overall score, area table, chart, focus-first line, and suggested actions. The form, the score buttons, and the on-screen buttons are left off.

For a single A4 page, use Chrome, A4 paper, and the default margins, and keep the engagement name and the client each to one line. A longer name or client is still printed in full and may wrap onto another line.

Start again

Start new assessment asks: **Start a new assessment? This clears the current answers.**

- **Cancel** leaves everything as it is.
- **OK** clears the name, the client, and all 20 answers, sets the date to today, and hides the results.

What this app does not do

It does not have accounts, a shared database, or a link you can send so someone else sees the same answers. To share the result, print it or save the PDF and send that file.
